OVERVIEW: The 28 000-hectare (69 000-acre) Chitabe Concession, situated in the south-east of the Okavango Delta, is separated from the well-known Moremi Game Reserve by the Gomoti Channel. This eastern half of the concession is characterised by grassy floodplains which separate the Channel from acacia and mopane woodland. The western half of the concession has as its boundary the Santantadibe River and here a variety of typical Okavango habitats – seasonal palm-dotted floodplains, to wooded islands, tranquil waterways and dry woodland – ensure a year-round variety of game viewing and birding experiences. It is this diversity and a mix of Okavango and Kalahari habitats that makes Chitabe unique and which allows good concentrations of all the larger predators – lion, leopard, spotted hyaena, cheetah and wild dog – as well as herbivores like giraffe, buffalo, lechwe, tsessebe, impala, zebra, hippo and elephant.

WILDLIFE: The area is a combination of open grasslands, acacia woodland and shallow waterways. Game viewing is varied from the lush green period after the rains to the dry winter months when plains game numbers peak. Buffalo, elephant, lion, warthog, lechwe, hippo, giraffe, leopard, cheetah and tsessebe are found throughout the year. Wild dog are frequently seen in the concession.
